RSS:

Connect your Digital Signage to RSS live-feeds and get regular updates from Weather or Exchangerates or News.

Zone Sync:

let your content be synchronized with other Zones, for example play the product introduction movie and show at the same time the price and the product pictures.

MSS 970 -I1/I2

MSS 970-A1

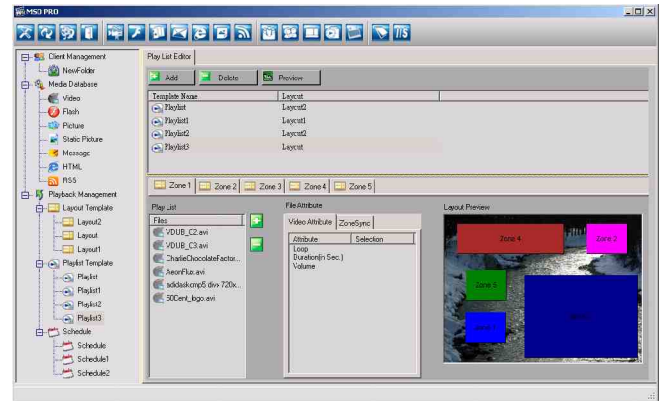

Simple But Powerful Management Software- MSO PRO

Powerful Digital Signage Management Software

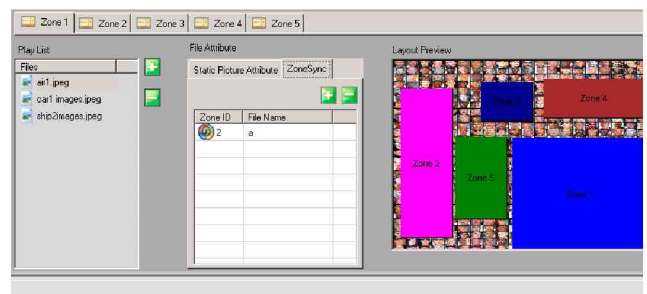

MSS970 series all bundled with powerful digital signage management software – MSO Pro. The all new Dynamic Pictures and Messages can create endless possibilities for attracting your customers. The variety is giving you nearly the flexibility of an Graphical Art work tool but brings you also the Winmate easy-to-use Design, so in only 10 minutes you can become the professional user for these features. Winmate's Video Usermanual will guide you step by step thru the process and lat you learn faster then ever!

The great and easy to use Graphical User Interface (GUI) makes it easy to create all kinds of contents.

Special Feature explained : Zone Sync

Most digital signage players in the market use independent playlist for video/picture/message zones, that makes your advertising content irrelevant to each other. Imagine you are playing a new sports car campaign but the ticker message encourages people to take public transportation to save our earth? MSO Pro allows user to synchronize content playback between different zones. For instance, you can define related picture and message when play an advertising video.

So it is possible to show the Airplane Video, the Airplanes Models as Pictures or Flash and the Airplane Promotion Prices, at the exact same time

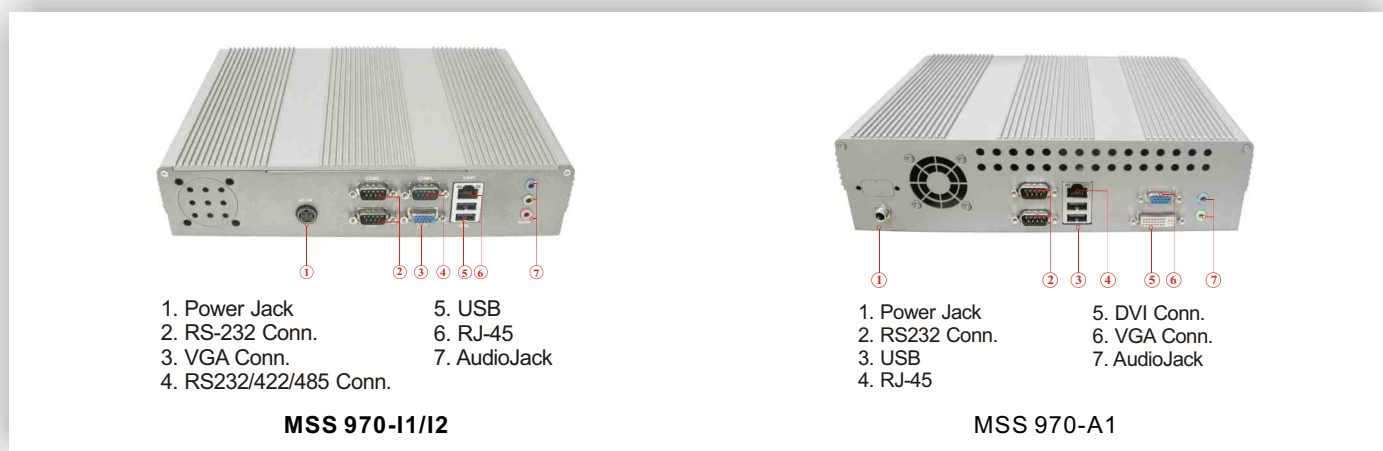

Triggers Message

3 Models For ANY Applications

The MSS970 series comes with the Embedded Operating System and all the Player Software is installed on an Industrial Grade CF card in Protected Mode, with Automatic update possibility from the MSO Pro Software. The Player is capable of playing nearly all Video, Picture, HTML and many other Multimedia Formats. The amazing Layout Flexibility with Background picture, up to 9 suggested different Zones and Multimedia Flexibility makes this Player become a number One!

The attractive and elegant housing design of MSS-970 series is coming from industrial experience of over 15 years in Design and Manufacturing. It is a very rugged construction, from mechanical housing, the OS design, industrial grade storage and the Player Software with the robust communication with the Server to the MSO Pro Management Software.

Model Performance comparison
